Customer profile

- Industry: Academic
- Subscription activation year: 2013
- Number of users being supported: 700
- Number of locations being supported: 1 (the entire university)
- Key publishers being used: AIIM, ASHRAE, AWWA, ISO

Summary

What challenges did the customer face with standards?

The main challenge was providing standards access to a student body of over 30,000 potential users. They needed to have not only the most current required content but also historical versions, too.

Lessons learned

How did Techstreet Enterprise overcome these challenges?

The *Techstreet Enterprise* platform gives access to standards without creating individual accounts for every user. It provides a managed platform with the most up-to-date standards and their historical versions. Its ability to add standards when needed is important. Because of this, the students have variety in content from one semester to another.
