Customer profile

- Industry: Pharmaceutical
- Subscription activation year: 2009
- Number of users being supported: 1,100
- Number of locations being supported: 4
- Key publishers being used: AAMI, ASME, ISPE

Summary

What challenges did the customer face with standards?

The pharmaceutical industry is heavily regulated. This customer faced ongoing challenges managing paper and PDF single-user standards. Additionally, in pharmaceutical R&D and manufacturing, standards were updated constantly. Keeping up was overwhelming and unrealistic. Users were also purchasing redundant standards, wasting company resources.

Lessons learned

How did Techstreet Enterprise overcome these challenges?

Techstreet Enterprise enabled the business to control their digital collection, with multi-user, multi-location access. Guaranteed updates with alerts ensured no one missed anything. As a result, the business cut redundant purchases, and a well-managed method meant users could request extra standards content. The business gained cost savings and efficiency, allowing them to focus on other obstacles.

Besides pharmaceutical R&D standards, our solution also supports manufacturing and building maintenance standards. This is a long-term customer who has used Techstreet Enterprise over many years.
