Glossary of equivalent standards	iv
Committee representation	vi
Foreword	ix
1 Scope.....	1
1.1 Inclusions.....	1
1.2 Exclusions.....	1
2 Normative references.....	1
3 Terms and definitions.....	2
4 Definition and maintenance of product families for dose setting, dose substantiation, and sterilization dose auditing	3
4.1 General	3
4.2 Defining product families.....	4
4.3 Designation of product to represent a product family for performance of a verification dose experiment or a sterilization dose audit.....	4
4.3.1 Product to represent a product family.....	4
4.3.2 Master product.....	4
4.3.3 Equivalent product.....	4
4.3.4 Simulated product.....	5
4.4 Maintaining product families.....	5
4.5 Effect of failure on establishment of sterilization dose or of a sterilization dose audit on a product family	5
5 Selection and testing of product for establishing and verifying the sterilization dose	5
5.1 Nature of product	5
5.2 Sample Item Portion (SIP)	5
5.3 Sampling conditions.....	5
5.3.1 Special considerations for batches.....	6
5.3.2 Use of multiple batches in dose setting	6
5.4 Microbiological testing.....	6
5.4.1 Bioburden test considerations for tissue	6
5.4.2 Test of sterility considerations for tissue	8
5.4.3 Validation of microbiological test methods.....	9
5.5 Irradiation.....	10
5.5.1 General.....	10
5.5.2 Loading pattern—Special considerations for refrigerated product	10
5.5.3 Dose mapping—Special considerations for refrigerated product	10
5.5.4 Requirements for repetition of dose mapping	11
5.5.5 Routine processing.....	11
6 Methods of dose establishment	11
6.1 General	11
6.2 Selecting a method for the establishment of a sterilization dose.....	11
6.3 Establishing a maximum acceptable dose	11
6.4 Dose auditing	11
Bibliography	11
