

<b>Contents</b>	<b>Page</b>
1 Scope .....	1
2 Classification .....	1
2.1 Quality verification levels (grades).....	1
2.2 Types.....	1
2.3 Quality tests.....	1
3 Quality verification systems.....	1
3.1 Production qualification tests.....	1
3.2 Analytical requirements of the production qualification tests.....	3
3.3 Lot acceptance tests.....	3
4 Sampling .....	3
4.1 Sample size .....	3
4.2 Gaseous samples.....	3
4.3 Liquid samples.....	4
5 Analytical procedures .....	4
5.1 Parameters of analysis .....	4
5.2 Percent oxygen.....	5
5.3 Acetylene content.....	5
5.4 Carbon dioxide content.....	6
5.5 Carbon monoxide content .....	6
5.6 Ethane and other hydrocarbons (as ethane) content .....	6
5.7 Ethylene content.....	6
5.8 Halogenated refrigerant and solvent content .....	7
5.9 Methane content.....	7
5.10 Nitrogen content .....	7
5.11 Nitrous oxide content.....	7
5.12 Odor.....	7
5.13 Other components.....	7
5.14 Permanent particulates of type II .....	7
5.15 Total hydrocarbon content.....	8
5.16 U.S. Pharmacopeia tests.....	8
5.17 Water content .....	8
6 Containers .....	8
6.1 Oxygen containers.....	8
6.2 Container preparation.....	9
6.3 Oxygen (USP) .....	9
6.4 Valves on oxygen containers.....	9
7 Moisture conversion data .....	10
8 References .....	12
 <b>Tables</b>	
Table 1—Directory of limiting characteristics/quality verification levels (QVL).....	2
Table 2—Typical uses.....	2
Table 3—Moisture conversion data .....	10
