Technical Committee on Health Care Facility Engineering and Physical Plant  v

Subcommittee on Infection Control during Construction, Renovation, and Maintenance of Health Care Facilities  vi

Preface  viii

0 Introduction  1

1 Scope  2

2 Reference publications  2

3 Definitions  3

4 Risk factors and sources of construction-related infections in health care facilities  5
4.1 General  5
4.2 Risk factors for infections  5
4.2.1 Environmental risk factors  5
4.2.2 Reduced immunity  5
4.3 Sources of infection  6

5 Appropriate selection, design, application, specification, and assembly of construction materials  7
5.1 General  7
5.2 Susceptibility to moisture damage  7
5.3 Performance of construction materials  7
5.4 Selection and usage  8
5.5 Shipping, handling, and storage of construction materials  8
5.5.1 General  8
5.5.2 Construction materials susceptible to contaminants and moisture damage  9
5.5.3 Mechanical equipment and ductwork  9
5.5.4 Woven fabrics, fabric-covered products, and wood-based composite core products with veneers  9

6 Procedures  9
6.1 Infection prevention and control measures  9
6.2 Multidisciplinary teams  10
6.2.1 General  10
6.2.2 Permanent multidisciplinary teams  10
6.2.3 Expertise  10
6.3 Communication  10
6.4 Plumbing and ventilation  10
6.5 Preventive measures analysis  10
6.6 Air quality  11
6.6.1 Dust control  11
6.6.2 Environmental-biological air sampling  11
6.7 Water quality  12
6.8 Personnel and their responsibilities  13
6.8.1 General  13
6.8.2 Infection prevention and control professional (ICP)  13
6.8.3 Administrators  14
6.8.4 Facility project manager 14
6.8.5 Environmental services personnel 14
6.8.6 Health care staff 14
6.8.7 Design professionals 14
6.8.8 Operations and maintenance staff 15
6.8.9 Constructors 15

7 Infection prevention and control measures 16
7.1 Before construction 16
7.1.1 General 16
7.1.2 Preventive Measure I 16
7.1.3 Preventive Measure II 16
7.1.4 Preventive Measure III 17
7.1.5 Preventive Measure IV 17
7.2 During construction 17
7.2.1 Preventive Measure I 17
7.2.2 Preventive Measure II 17
7.2.3 Preventive Measure III 19
7.2.4 Preventive Measure IV 21
7.3 After construction 22
7.3.1 Preventive Measure I 22
7.3.2 Preventive Measures II and III 22
7.3.3 Preventive Measure IV 22

8 Infection prevention and control measures for new construction projects 22

9 Remedial measures 24
9.1 General 24
9.2 Water leaks and flooding 24
9.3 Investigation 24
9.4 Containment of contaminants 24
9.5 Corrective measures 25
9.6 Abatement measures 25
9.7 Inspection of remediated areas 26

10 Quality system 26

Annexes
A (informative) — Preventive measures 32
B (informative) — The infection prevention and control professional 39

Tables
1 — Preventive measures analysis 28
2 — Population risk groups and geographical areas 29
3 — Construction activity type 30
4 — Time required for airborne contaminant removal at efficiencies of 99 and 99.9% 31
