

American Nuclear Society

REAFFIRMED

December 11, 2015

**ANSI/ANS-1987;R1998; R2007;
R2015**

**program for testing radiation shields
in light water reactors (LWR)**

an American National Standard

This standard has been reviewed and reaffirmed with the recognition that it may reference other standards and documents that may have been superseded or withdrawn. The requirements of this document will be met by using the version of the standards and documents referenced herein. It is the responsibility of the user to review each of the references and to determine whether the use of the original references or more recent versions is appropriate for the facility. Variations from the standards and documents referenced in this standard should be evaluated and documented. This standard does not necessarily reflect recent industry initiatives for risk informed decision-making or a graded approach to quality assurance. Users should consider the use of these industry initiatives in the application of this standard.

American National Standard

Designation of this document as an American National Standard attests that the principles of openness and due process have been followed in the approval procedure and that a consensus of those directly and materially affected by the standard has been achieved.

This standard was developed under the procedures of the Standards Committee of the American Nuclear Society; these procedures are accredited by the American National Standards Institute, Inc., as meeting the criteria for American National Standards. The consensus committee that approved the standard was balanced to assure that competent, concerned, and varied interests have had an opportunity to participate.

An American National Standard is intended to aid industry, consumers, governmental agencies, and general interest groups. Its use is entirely voluntary. The existence of an American National Standard, in and of itself, does not preclude anyone from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard.

By publication of this standard, the American Nuclear Society does not insure anyone utilizing the standard against liability allegedly arising from or after its use. The content of this standard reflects acceptable practice at the time of its approval and publication. Changes, if any, occurring through developments in the state of the art, may be considered at the time that the standard is subjected to periodic review. It may be reaffirmed, revised, or withdrawn at any time in accordance with established procedures. Users of this standard are cautioned to determine the validity of copies in their possession and to establish that they are of the latest issue.

The American Nuclear Society accepts no responsibility for interpretations of this standard made by any individual or by any ad hoc group of individuals. Requests for interpretation should be sent to the Standards Department at Society Headquarters. Action will be taken to provide appropriate response in accordance with established procedures that ensure consensus on the interpretation.

Comments on this standard are encouraged and should be sent to Society Headquarters.

Foreword

(This Foreword is not a part of American National Standard Program for Testing Radiation Shields in Light Water Reactors (LWR), ANSI/ANS-6.3.1-1987.)

Working Group ANS 6-3 of the American Nuclear Society Standards Committee was originally formed with the objective of developing standards for an operational shield test program to be used in evaluating installed biological shielding in nuclear power plants. The standard was prepared in 1972 and was adopted as American National Standard Program for Testing Biological Shielding in Nuclear Reactor Plants, N18.9-1972 (ANS-6.3). The N18.9-1972 document was endorsed in the U.S. Nuclear Regulatory Commission's Regulatory Guide 2.1, "Shield Test Program for the Evaluation of Installed Biological Shielding in Research and Training Reactors," and issued in May 1973.

In the latter part of 1973, Working Group ANS-6.3 was reorganized to develop a standard for a radiation shield testing program of reactor power plants. This standard was produced as a revision to N18.9-1972 and designated ANS-6.3.1. It was approved in 1980 as American National Standard Program for Testing Radiation Shields in Light Water Reactors (LWR), ANSI/ANS-6.3.1-1980.

In accordance with procedures of the American Nuclear Society Standards Committee for maintenance of standards, the ANS-6.3.1 Working Group was reconvened in 1984 to review the standard. The working group ascertained that the in-field utilization of the current standard was found to be effective by the utility industry and architect/engineering firms. Minor editorial revisions but no technical modifications were made to update the material.

The membership of the working group at the time of its approval of this revision was:

P. J. Persiani, Chairman, <i>Argonne National Laboratory</i>	R. A. Pavlick, <i>Consultant, Commonwealth Edison Co.</i>
D. W. Briden, <i>Toledo Edison Company</i>	F. Skopec, <i>U.S. Nuclear Regulatory Commission</i>
W. De Lise, <i>Sargent and Lundy</i>	T. E. Todd, <i>Tennessee Valley Authority</i>

The membership of Subcommittee ANS-6, Radiation Protection and Shielding, at the time of its approval of this revision was:

D. K. Trubey, Chairman, *Oak Ridge National Laboratory*
E. T. Boulette, *Maine Yankee Atomic Power Company*
J. C. Celnik, *Stone & Webster Engineering Corporation*
D. R. Harris, *Rensselaer Polytechnic Institute*
W. C. Hopkins, *Bechtel Corporation*
E. Normand, *Boeing Aerospace Corporation*
P. J. Persiani, *Argonne National Laboratory*
D. J. Schuh, II, *GEB Controls Group, Inc.*

The Consensus Committee N17, Research Reactors, Reactor Physics, and Radiation Shielding, had the following membership at the time it reviewed and approved this standard:

R. S. Carter, Chairman

T. M. Raby, Secretary

S. H. Brown	Health Physics Society
A. D. Callihan (Subcommittee ANS-1)	Individual
R. E. Carter	U.S. Nuclear Regulatory Commission
R. S. Carter	American Nuclear Society
A. De La Paz (Subcommittee ANS-14)	Department of U.S. Army
D. Duffey	American Institute of Chemical Engineers
H. Goldstein	American Physical Society
P. B. Hemming	U.S. Department of Energy
J. W. Lewellen (Alt.)	
W. A. Holt	American Public Health Association
L. I. Kopp (Subcommittee ANS-10)	U.S. Nuclear Regulatory Commission
J. E. Olhoeft	Individual
T. M. Raby	National Bureau of Standards
W. J. Richards (Subcommittee ANS-15)	U.S. Air Force
M. M. Ter Pogossian	American College of Radiology
D. K. Trubey (Subcommittee ANS-6)	Oak Ridge National Laboratory
A. Weitzberg (Subcommittee ANS-19)	NUS Corporation
W. L. Whittemore	Individual

Contents	Section	Page
	1. Introduction	1
	2. Scope	1
	3. Definitions	1
	3.1 Limitations	1
	3.2 Shall, Should, and May	1
	3.3 Glossary of Terms	1
	4. Objective of Test Program	2
	5. Radiation Shield Testing Program	2
	5.1 General	2
	5.2 Selection of Locations of Measurements	2
	5.3 Methods of Measurements	5
	5.4 Shield Testing Phases	6
	5.5 Relation of the Radiation Shield Test Program to Other Routine Operating Radiation Survey Programs	8
	6. Instrumentation	9
	6.1 General Characteristics	9
	6.2 Gamma-ray Instrumentation	9
	6.3 Neutron Instrumentation	9
	6.4 Other Shield Test Dosimetry	9
	7. Administrative Practices	10
	7.1 Design Information	10
	7.2 Administrative Controls	10
