an American National Standard

REAFFIRMED

November 11, 2011
ANSI/ANS-8.22-1997
(R2011)

This standard has been reviewed and reaffirmed with the recognition that it may reference other standards and documents that may have been superseded or withdrawn. The requirements of this document will be met by using the version of the standards and documents referenced herein. It is the responsibility of the user to review each of the references and to determine whether the use of the original references or more recent versions is appropriate for the facility. Variations from the standards and documents referenced in this standard should be evaluated and documented. This standard does not necessarily reflect recent industry initiatives for risk informed decision-making or a graded approach to quality assurance. Users should consider the use of these industry initiatives in the application of this standard.

American National Standard

Designation of this document as an American National Standard attests that the principles of openness and due process have been followed in the approval procedure and that a consensus of those directly and materially affected by the standard has been achieved.

This standard was developed under procedures of the Standards Committee of the American Nuclear Society; these procedures are accredited by the American National Standards Institute, Inc., as meeting the criteria for American National Standards. The consensus committee that approved the standard was balanced to ensure that competent, concerned, and varied interests have had an opportunity to participate.

An American National Standard is intended to aid industry, consumers, governmental agencies, and general interest groups. Its use is entirely voluntary. The existence of an American National Standard, in and of itself, does not preclude anyone from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard.

By publication of this standard, the American Nuclear Society does not insure anyone utilizing the standard against liability allegedly arising from or after its use. The content of this standard reflects acceptable practice at the time of its approval and publication. Changes, if any, occurring through developments in the state of the art, may be considered at the time that the standard is subjected to periodic review. It may be reaffirmed, revised, or withdrawn at any time in accordance with established procedures. Users of this standard are cautioned to determine the validity of copies in their possession and to establish that they are of the latest issue.

The American Nuclear Society accepts no responsibility for interpretations of this standard made by any individual or by any ad hoc group of individuals. Requests for interpretation should be sent to the Standards Department at Society Headquarters. Action will be taken to provide appropriate response in accordance with established procedures that ensure consensus on the interpretation.

Comments on this standard are encouraged and should be sent to Society Headquarters.

Foreword

(This Foreword is not a part of American National Standard for Nuclear Criticality Safety Based on Limiting and Controlling Moderators, ANSI/ANS-8.22-1997.)

This standard has been in the draft stage for more than two decades with several different chairmen and several different working groups. The continuing effort over many years illustrates the consistent desire for a standard for moderation control. Diversity in the individuals in the working group and diversity in the organizations that the individuals represent have made this standard a tool that can be used throughout the complex. The interest in this standard is consistently demonstrated by the large attendance at the working group meetings and by the large membership of the current Working Group ANS-8.22. Many ideas have been brought before the working group ranging from publication of definitive limits to a standard for general guidance specific to limiting and controlling moderators.

This new standard was prepared by Working Group ANS-8.22 of Subcommittee 8 of the Standards Committee of the American Nuclear Society. This working group was composed of:

J. S. Bullington, *Chairman, Westinghouse Safety Management Solutions*
J. J. Bazley, *Parallax, Inc.*
G. H. Bidinger, *Individual*
C. L. Brown, *Individual*
W. E. Cox, *Individual*
M. J. Crouse, *Westinghouse Safety Management Solutions*
L. C. Davenport, *Individual*
E. P. Elliot, *Individual*
I. E. Fergus, *U.S. Department of Energy*
A. L. Hess, *Westinghouse Hanford Company*
J. E. Hicks, *Safe Sites of Colorado, LLC.*
B. O. Kidd, *Babcock & Wilcox Company*
B. J. Klotz, *Individual*
C. D. Manning, *Siemens Power Corporation*
R. C. McBroom, *U.S. Department of Energy*
R. D. Montgomery, *Westinghouse Commercial Nuclear Fuels Division*
R. L. Oxenham, *Individual*
T. A. Reilly, *Westinghouse Safety Management Solutions*
C. A. Rogers, *Westinghouse Hanford Company*
B. M. Rothleder, *U.S. Department of Energy*
R. E. Rothe, *Individual*
R. V. Stachowiak, *Kaiser Hill Company, LLC.*
J. E. Tanner, *Individual*
R. A. Williams, *Westinghouse Commercial Nuclear Fuels Division*

Working Group ANS-8.22 specifically recognizes R. L. Oxenham for his efforts in preparation of this standard. This standard is dedicated in his memory.

The Membership of Subcommittee ANS-8 at the time of this standard's initial vote was:

T. P. McLaughlin, Chairman, *Los Alamos National Laboratory*
J. A. Schlessor, Secretary, *Los Alamos National Laboratory*
F. M. Alcorn, *Babcock & Wilcox Company*
R. D. Carter, *Mohr & Associates*
E. D. Clayton, *Individual*
D. M. Dawson, *E. R. Johnson, Assoc., Inc.*
D. R. Finch, *Westinghouse Savannah River Company*
A. S. Garcia, *Argonne National Laboratory*
C. M. Hopper, *Oak Ridge National Laboratory*
E. B. Johnson, *Oak Ridge National Laboratory*
N. Ketzlach, *Individual*
R. Kiyose, *Tokai University*
R. A. Libby, *BPNWL*
W. G. Morrison, *Individual*
D. A. Reed, *Martin Marietta Energy Systems, Inc.*
D. R. Smith, *Individual*
J. T. Thomas, *Individual*
H. Toffer, *Safe Sites of Colorado, LLC.*
G. E. Whitesides, *Individual*

Consensus Committee N16, Nuclear Criticality Safety, had the following membership at the time of its approval of this standard:

D. R. Smith, Chairman
R. A. Knief, Vice-Chairman

G. H. Bidinger Individual
R. D. Busch University of New Mexico
S. P. Congdon GE Nuclear Energy
H. L. Dodds, Jr. University of Tennessee
R. A. Knief Ogden Environmental and Energy Services
J. R. LaRiviere American Institute of Chemical Engineers
C. D. Manning Siemens Nuclear Power Corporation
S. P. Murray Health Physics Society
H. C. Paxton Individual
R. L. Reed Westinghouse Savannah River Company
B. M. Rothleder U.S. Department of Energy
F. W. Sanders Individual
D. R. Smith American Nuclear Society
R. G. Taylor Lockheed Martin Energy Systems, Inc.
J. T. Thomas Individual
R. M. Westfall Lockheed Martin Energy Research Corporation

Contents	Section	Page
	1. Introduction	1
	2. Scope	1
	3. Definitions	1
	3.1 Limitations	1
	3.2 Shall, Should, and May	1
	3.3 Glossary of Terms	1
	4. Nuclear Criticality Safety Practices	1
	4.1 Administrative Practices for Limitation and Control of Moderators	1
	4.2 Process Evaluation for Limitation And Control of Moderators	2
	5. Engineered Practices for Moderator Control Areas	2
	5.1 Moderator Control Area Barriers	2
	5.2 Equipment and Containers	3
	5.3 Penetrations	3
	5.4 Fire Prevention and Suppression	3
	5.5 Instrumentation and Controls	3
	6. References	3
 Appendices		
	Appendix A Typical Moderating Materials	4
	Appendix B Potential Sources of Moderators	5
	Appendix C Moderator Content Measurements	7
	Appendix D Examples of Engineered Barriers To Control Moderators	8
