This MSS Standard Practice was developed under the consensus of the MSS Technical Committee 113 and the MSS Coordinating Committee. The content of this Standard Practice is the result of the efforts of competent and concerned volunteers to provide an effective, clear, and non-exclusive specification that will benefit the industry as a whole. This MSS Standard Practice is intended as a basis for common practice by the manufacturer, the user, and the general public. The existence of an MSS Standard Practice does not in itself preclude the manufacture, sale, or use of products not conforming to the Standard Practice. Mandatory conformance is established only by reference in a code, specification, sales contract, or public law, as applicable.

Unless otherwise specifically noted in this MSS SP, any standard referred to herein is identified by the date of issue that was applicable to the referenced standard(s) at the date of issue of this MSS SP. (See Annex A.)

In this Standard Practice all notes, annexes, tables, and figures are construed to be essential to the understanding of the message of the standard, and are considered part of the text unless noted as “supplemental”. All appendices appearing in this document are construed as “supplemental”. “Supplemental” information does not include mandatory requirements.

Substantive changes in this 2004 edition are “flagged” by parallel bars as shown on the margins of this paragraph. The specific detail of the change may be determined by comparing the material flagged with that in the previous edition.

Non-toleranced dimensions in this Standard Practice are nominal, and, unless otherwise specified, shall be considered “for reference only”.

*Any part of this standard may be quoted. Credit lines should read ‘extracted from MSS SP-75, 2004 with permission of the publisher, the Manufacturers Standardization Society.’ Reproduction prohibited under copyright convention unless written permission is granted by the Manufacturers Standardization Society of the Valve and Fittings Industry, Inc.*

**TABLE OF CONTENTS**

<b><u>SECTION</u></b>	<b><u>PAGE</u></b>
1 SCOPE.....	1
2 PRESSURE RATING.....	1
3 SIZE.....	2
4 DESIGN PROOF-TEST.....	2
5 HYDROSTATIC TESTING.....	3
6 MATERIALS.....	3
7 CHEMICAL COMPOSITION.....	3
8 TENSILE PROPERTIES.....	3
9 HEAT TREATMENT.....	4
10 TRANSVERSE GUIDED-WELD BEND-TESTS.....	4
11 NOTCH-TOUGHNESS PROPERTIES.....	5
12 FITTING DIMENSIONS.....	5
13 TOLERANCES FOR WELDING FITTINGS.....	5
14 MANUFACTURE.....	6
15 NONDESTRUCTIVE EXAMINATION.....	7
16 INSPECTION.....	7
17 MARKING.....	8
TABLE 1 Maximum Limit of Chemical Elements.....	12
2 Tensile Requirements.....	12
3 Tolerances.....	13
4 Dimensions of Long-Radius Elbows.....	14
5 Dimensions of 3R Elbows.....	15
6 Dimensions of Straight Tees.....	16
7 Dimensions of Reducing Outlet Tees.....	17
8 Dimensions of Caps.....	20
9 Dimensions of Reducers.....	21
FIGURE 1 Recommended Bevel for Wall Thicknesses (t) at End of Fitting, 0.75 In. or Less.....	9
2 Recommended Bevel for Wall Thicknesses (t) at End of Fitting, Greater Than 0.75 In.....	9
3 Acceptable Design for Unequal Wall Thickness.....	10
4 Transverse-Face and Root-Bend Test Specimens.....	10
5 Guided-Bend Test Jig.....	11
ANNEX A Referenced Standards and Applicable Dates.....	23
APPENDIX X1 Supplementary Requirements.....	24
APPENDIX X2 Longitudinal-Bead Underbead Cracking Test.....	26
